### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on Preliminary Amendment filed on 9/27/2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 1-8, 10, 13-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Peterson et al (US 6,810,841).**

Peterson et al discloses the claimed invention in col. 2, lines 5-25, col. 4, lines 1-45, col. 5, lines 35-60, col. 6, lines 30-65, col. 7 lines 25-65, col. 8, lines 1-25 and figures 1, 2A, 2B, 3-5. Specifically Peterson et al discloses in accordance with the present invention a system is provided for

controlling a valve of an internal combustion engine. The system includes an electromagnet actuator having a coil and an armature magnetically coupled to the coil. The armature is coupled to the valve to stroke the valve between an open and closed position in response to a drive signal fed to the coil. The system produces an error signal as a function of a difference between a predetermined desired position time history (i.e., position trajectory), y.sub.d, for the armature for each stroke of the armature and the actual position trajectory of the armature, y, during such stroke. The error signal

Art Unit: 3747

is used to produce a feedforward command signal to a feedforward controller for use in providing the drive signal to the coil during a subsequent stroke. The response of the feedforward controller to the error signal in providing the drive signal is an inverse function the relationship between a change in armature position in response to a change in the drive signal.

***Allowable Subject Matter***

Claims 9, 11, 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HYDER ALI whose telephone number is (571)272-4836. The examiner can normally be reached on M-F (8:30-5:00).
